EDUCATION

B.Tech in Computer Science, Jaypee Institute Of Information Technology May 2023

SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Java, SQL
- **Frontend:** React, TanStack (Start/Query/Table), Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, GraphQL, WebSocket, MQTT
- **Databases & Caching:** MongoDB, Redis, PostgreSQL, MySql
- **Cloud, DevOps & Tools:** AWS, Docker, n8n, Git, Linux, FFmpeg, Postman, CI/CD

EXPERIENCE

Full-Stack Software Engineer - Zendot March 2025 - Present

- Architected a full-stack UAV telemetry and ground-control platform (React, TS, Node.js/Express), enabling real-time bi-directional communication via custom MQTT broker interfaces, WebSockets, and REST APIs.
- Developed a low-latency live camera and parameter ingestion pipeline using hardware-accelerated FFmpeg binaries to stream video and telemetry feeds directly to client dashboards.
- Scaled platform reliability for concurrent multi-drone fleet operations by introducing priority-based message ordering and a local Redis caching/queueing layer.
- Leading full-stack engineering of an enterprise performance and OKR management platform (TypeScript, TanStack Start, Express.js) currently deploying to a 200+ employee company, architected with extensible multi-tenant scalability to onboard future enterprise clients.

CyberSecurity Senior Analyst - Ernst and Young Global Feb 2023 - September 2023

- Engineered an internal full-stack data collection and survey platform (Node.js, Express, React) to streamline compliance tracking and reduce reporting turnaround time.
- Collaborated on a proof-of-concept containerized Security Operations Center (SOC) using Docker to automate vulnerability assessments across client web applications and Android packages (OWASP Top 10).

Summer Internship under Dr. Shradha Porwal, JIIT Noida June 2022 - August 2022

- Post Sharing Dec-App: Implemented an Ethereum-based decentralized application (Solidity, Web3.js, React) allowing users to connect crypto wallets, anonymously tip creators, and dynamically influence content ranking on-chain.

PROJECTS

Promanage Task Organiser : Distributed Workflow & Kanban Platform Deploy Link | Github

- Architected a full-stack task management platform with React on the frontend and Node.js/Express with MongoDB on the backend.
- Engineered an interactive Kanban board with drag-and-drop transitions across four lifecycle states (Backlog, ToDo, In-Progress, Done) using optimistic UI updates.
- Built an analytics dashboard utilizing MongoDB aggregation pipelines to summarize task velocity and distribution without blocking client requests.
- Implemented secure RESTful endpoints featuring JWT-based session management, data sanitization, and centralized error-handling middleware.
